Story

A detailed illustration of a whimsical scene. In the foreground, a young girl with pink hair, freckles, and a blue witch hat with a frog on top looks through a purple telescope. She is wearing a blue dress with a white collar. The room is dimly lit with blue and purple tones. To her right is a tall, ornate bookshelf filled with books, scrolls, and lit candles. In the background, a large arched window looks out onto a night sky with a large, glowing white moon. The words "THE MOON SCHOOL" are written in a purple, hand-drawn font across the moon. A bat-like creature hangs from the ceiling on the left, and a small frog is perched on the girl's hat. A stack of books sits on the floor near the telescope.

## DID YOU KNOW..?

A constellation is a group of stars close together that you can see in the night sky. You can identify them by their distinctive shapes and unique names. We've discovered almost 100! The oldest constellations in the Northern Hemisphere are the Big and Small Dippers. Connect the dots to reveal them:

### BIG DIPPER

### SMALL DIPPER

SOLUTIONS

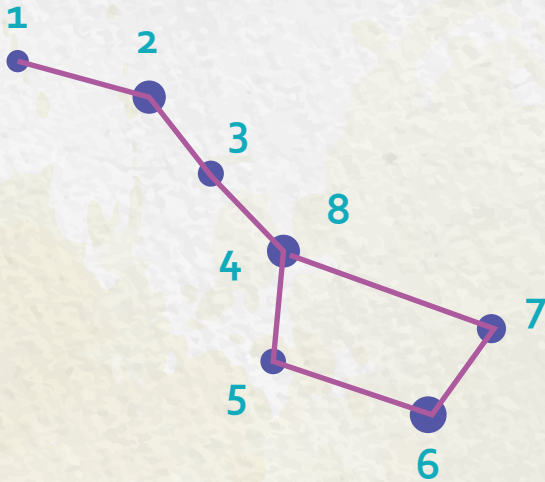

# 1 OBSERVATION GAME

Feathers : 5  
Stars : 26  
Crescent moons : 5
